■ Terms of Business for the Supply and Installation of Truss and Lighting Systems

■ Safety

For safety reasons, the following types of suspensions are **not** permitted:

- Items suspended from stand elements
- Suspensions intended to support stand elements or exhibits (stand elements and exhibits must be independently secured)
- Items suspended from the ceiling with a rigid or frictional connection to the hall floor.

Please note:

Load-bearing end-to-end cable connections

- may not be implemented using cable clamps
- must conform with DIN 56 921-11

1. With regard to the attachment and securing of objects to be suspended, pertinent safety regulations and in particular the provisions of the German Statutory Accident Insurance DGUV Regulation 1 (Principles of Prevention), DGUV Regulation 17 (formerly BGV C1), DGUV Regulation 54 (formerly BGV D8), DGUV-I 215-313 (formerly BGI 810-3) and, if applicable, VStättV (German safety code governing places of public assembly) must be observed.
2. Trusses with lighting systems are to be equipped by the system installer or via the service company responsible for suspension units with additional protective potential equalization (copper, min. 10 mm²) as per VDE 0100 part 711.

■ Technical details and important information

1. To the extent structurally feasible, Messe München GmbH will provide the exhibitor with a fixing point at the desired position above the stand floor area and within the stand perimeter.

Please note: Constructions to be suspended may be placed only within the stand area. Messe München GmbH will review documentation submitted for feasibility of the desired fixing points.

2. Hanging of items from the hall ceilings will be carried out exclusively through Messe München GmbH's accredited contractors.
3. Each suspension point on the hall ceiling structures may carry a maximum 25 kg and in the hall atriums 100 kg perpendicular load. The maximum area load is 5 kg/m² stand area.

Any rented equipment and materials must be returned directly to the contracted service company by the end of the stand dismantling period at the latest. Exhibitors will be invoiced for damage to equipment and materials.

4. Fixing objects to be suspended (light trusses, spotlights, banners, flags, etc.) at the fixing points is the responsibility of the exhibitor and will be carried out by Messe München GmbH's service partners upon request. Materials required to attach elements to the fixing points are not included in the standard service, but are available for rental from Messe München GmbH upon request.

5. **The main electrical connection for lighting, etc. should be ordered separately using form 3.1.**

6. Suspension points for Halls 1–4 can be ordered using Form 4.1. For suspension points in the hall atriums, please contact TRUE LOGIK GmbH directly. Please note that suspension points in the atriums are charged according to expenditure. TRUE LOGIK will be happy to send you a non-binding quote.

■ Order deadline

1. Orders are to be submitted no later than four weeks before the official stand setup period begins. In the case of the late submission of orders, no guarantee can be given concerning the availability of the items required. **In case of late receipt of order, Messe München GmbH reserves the right to examine any additional costs incurred and, if appropriate, make a separate offer for the additional costs concerned.**
2. Cancellations can only be made up to 14 days prior to the commencement of the official stand assembly period. The services provided up until this point in time are to be remunerated. After this time, Messe München GmbH is entitled but not obliged to provide the services ordered. The additionally provided services are to be remunerated. Any amendment thus constitutes a cancellation of the original order and placement of an additional order.
3. Messe München GmbH's General Terms of Contract for Exhibitor Services apply additionally.
